vercel.json	feat: implement automatic commit...	yesterday

README

This is a Next.js project bootstrapped with `create-next-app` .

Getting Started

First, run the development server:

```
npm run dev
# or
yarn dev
# or
pnpm dev
# or
bun dev
```

Open http://localhost:3000 with your browser to see the result.

You can start editing the page by modifying `app/page.tsx` . The page auto-updates as you edit the file.

This project uses `next/font` to automatically optimize and load Geist, a new font family for Vercel.

Learn More

To learn more about Next.js, take a look at the following resources:

- Next.js Documentation - learn about Next.js features and API.
- Learn Next.js - an interactive Next.js tutorial.

You can check out the Next.js GitHub repository - your feedback and contributions are welcome!

Deploy on Vercel

The easiest way to deploy your Next.js app is to use the Vercel Platform from the creators of Next.js.

Check out our Next.js deployment documentation for more details.

Releases

No releases published
Create a new release

Packages

No packages published
Publish your first package

Languages

TypeScript 98.5% CSS 1.3% JavaScript 0.2%

Suggested workflows

Based on your tech stack

Webpack Configure

Build a NodeJS project with npm and webpack.

Datadog Synthetics Configure

Run Datadog Synthetic tests within your GitHub Actions workflow

Publish Node.js Package to GitHub Packages Configure

Publishes a Node.js package to GitHub Packages.
